

## Snow Removal Procedures

The snow removal procedures will be reviewed annually by the Executive Board. These are the procedures currently in place:

- a. The contractor will clear the main roads and clubhouse parking lot first. No on-street parking or clubhouse parking allowed during a snow storm prior to the clearing process.
- b. Once the main roads and clubhouse are cleared, residents vehicles may be parked on **one side of the street only or in the clubhouse parking lot**. When your driveway has been cleared you must move your vehicle back to your residence.
- c. Walkways may be done once or twice depending on the snowfall.

Remember, there is a first, and there is a last. Eventually, all roads, driveways and walkways will be done.

Your patience and cooperation is appreciated.
